

# Character Comprehension

Today we are going to be having a closer look at the characters in the film, the moon creature and the robot.

We are going to be thinking about what we can see and then **inferring** how they might be feeling and what they might be thinking.

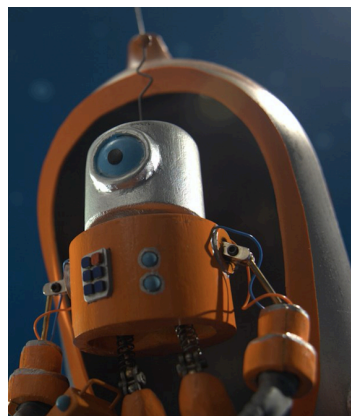

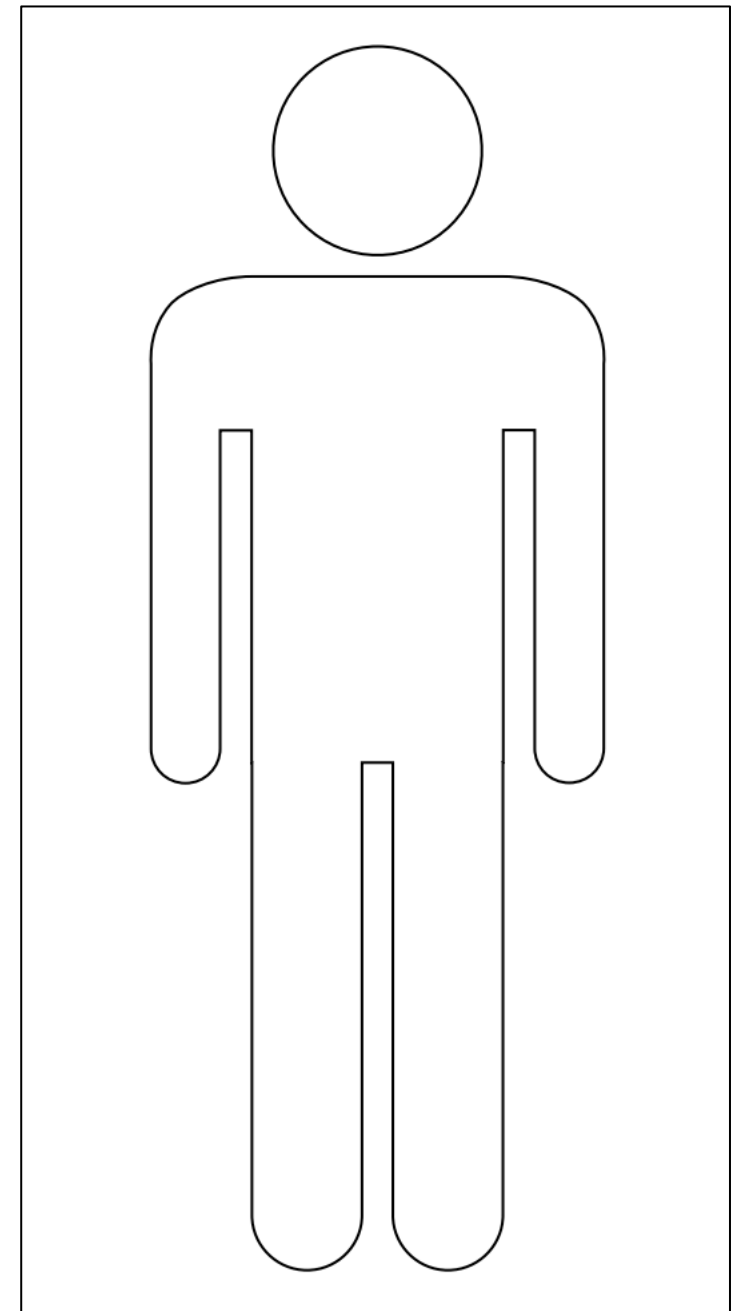

# Character Role

**Think about the two characters. For both the robot and the moon creature, I would like you to complete a character role sheet.**

This involves writing what we actually know about the character on the outside of the diagram. This is what we can see and know is true just from watching the clip.

Then we will write what we can infer about the character's thoughts, feelings and personality, on the inside of the diagram.

Look at the next slide for an example.

# The Robot

1. Write the name of the character at the top as your title

2. Write what you know about the character on the outside – these are things you can see in the film

3. Write the things you infer about the character on the inside – these are things you assume or think because of what you saw, for example, their thoughts, feelings and character.

The robot does not live on the moon.

**2. What we know - retrieval**

The robot doesn't like the moon creature taking the camera because he is only allowed to take pictures of rocks.

**3. Feelings - or what we can infer**

The robot is worried when the rocket flies away without him.

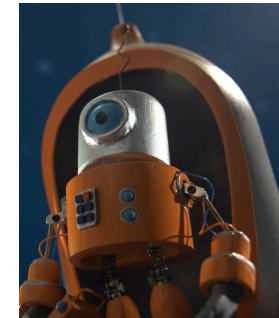

The robot has been instructed to take pictures of rocks.

# Challenge: Venn Diagram

## Do you fancy a challenge?

Use the Venn Diagram challenge sheet or draw your own to compare the two characters. Looking at your two Character role diagrams – what is similar about the two characters (this goes in the middle section) and what is different about the two characters (this goes in the section closest to the character you are talking about).

**You can either download the template or draw your own in your home learning book.**

Things that just about the moon creature

Things that are just about the robot

Things that are the same about both characters
